DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 7-12, 13-19 and 21, drawn to an apparatus for utilizing ultraviolet light, classified in class 210, subclasses 748, 764 and class 250, subclass 453.11.
 - II. Claim 20, drawn to ultraviolet neutralization of particulates in air streams, classified in class 422, subclass 24.
2. Inventions 1-19, 21 and 20 are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatuses as claimed can be used to perform process other than ultraviolet neutralization of air streams as required by the method claim; for example for ultraviolet treatment of liquids in conduits.
3. Because these inventions are independent or distinct for the reasons given above and there would be serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP 808.02), restriction for examination purposes as indicated is proper.
